## Profile

Angela Becker has been a physical therapist for 8 years, working primarily in outpatient orthopedics. I have treated a wide range of orthopedic and neurological conditions, including , but not limited to, cervical, lumbar, vestibular, and central/peripheral nervous system disorders. I strive to incorporate evidence based practice and provide hands on care to improve patients' quality of life and maximize their functional independence. I believe patient education and involvement is key to their success in the rehabilitation process.

I have served as a clinical instructor to physical therapy students throughout my 8 years as a PT, and enjoy providing them with a structured and effective learning environment. I enjoy engaging in ongoing education and research through continuing education courses to provide patients with an individualized evaluation and treatment plan. I incorporate a wide variety of techniques including manual therapy, Mulligan, and Maitland techniques.

In my free time, I love spending time with my husband, our 2 children, and our dog Winnie, residing in Manteno, IL.

## Education

- Bachelors of Science, Illinois State University
- Doctor of Physical Therapy, Bradley University
