

Trigger Finger Release Protocol

Dr. Michael Chiu, MD
Illinois Bone and Joint Institute
Phone: (847)870-6100
Fax: (847)870-8159

Post-Op Weeks 1-2:

- Continue surgical dressing until clinic visit
- Elevate arm and perform finger ROM exercises frequently to minimize swelling and avoid stiffness
- Avoid finger over-extension and stressing hand incision(s), while promoting soft tissue healing

Post-Op Weeks 2-3:

- Scar management/massage
- Light functional use of hand (eating, typing) with lifting less than 1 lb.
- Light gripping or pinching

Post-Op 3-8 Weeks:

- Progress ROM until within normal limits
- Initiate strengthening program, gradually increased
- Encourage independent and functional use of the hand.
